

Eliminates 99.9% of bacteria with Sanitize Wash

Complete Hygiene for Everyday Living

Whirlpool

Wash Your Worries Away

Health takes center stage in our lives and hygiene plays an essential role in keeping your family safe. Ensuring that your daily wearables are of utmost cleanliness provides a measure of protection and a peace of mind.

Thoughtfully designed with innovative technology and features, our latest **SaniCare Washers** and all-in-one **Washer-dryers** deliver complete **hygiene protection** for you and your family.

Protection for Health and Comfort

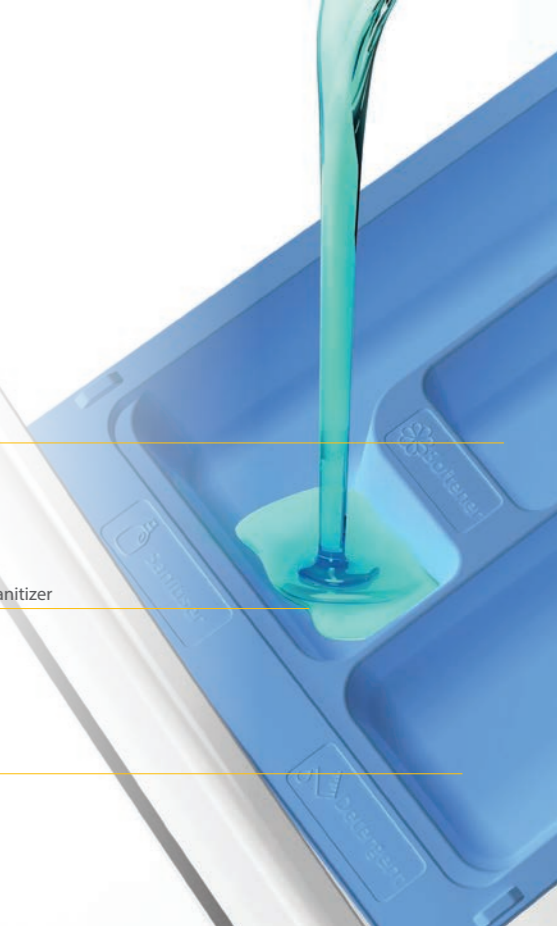

Hygienically clean and fresh smelling laundry

With a **dedicated Laundry Sanitizer compartment** within the detergent drawer, the SaniCare series incorporates both sanitizer and softener into the rinse cycle. It effectively sanitizes your clothes, offering a high level of hygiene in every wash, while keeping them fresh and soft.

Softener

Laundry Sanitizer

Detergent

Eliminates 99.9% of bacteria

Your daily defence against external pollutants. **Sanitize Wash program** removes 99.9%¹ of bacteria at a low temperature wash of 40°C through the use of laundry sanitizer. Unlike the conventional method of cleaning at high temperatures, you can now give your clothes the protection they deserve without damaging them.

How does Sanitize Wash work?

3-stage wash cycle for utmost cleanliness.

01 WASH

Main wash uses detergent to **remove daily dirt and grime** from your laundry.

02 SANITIZE

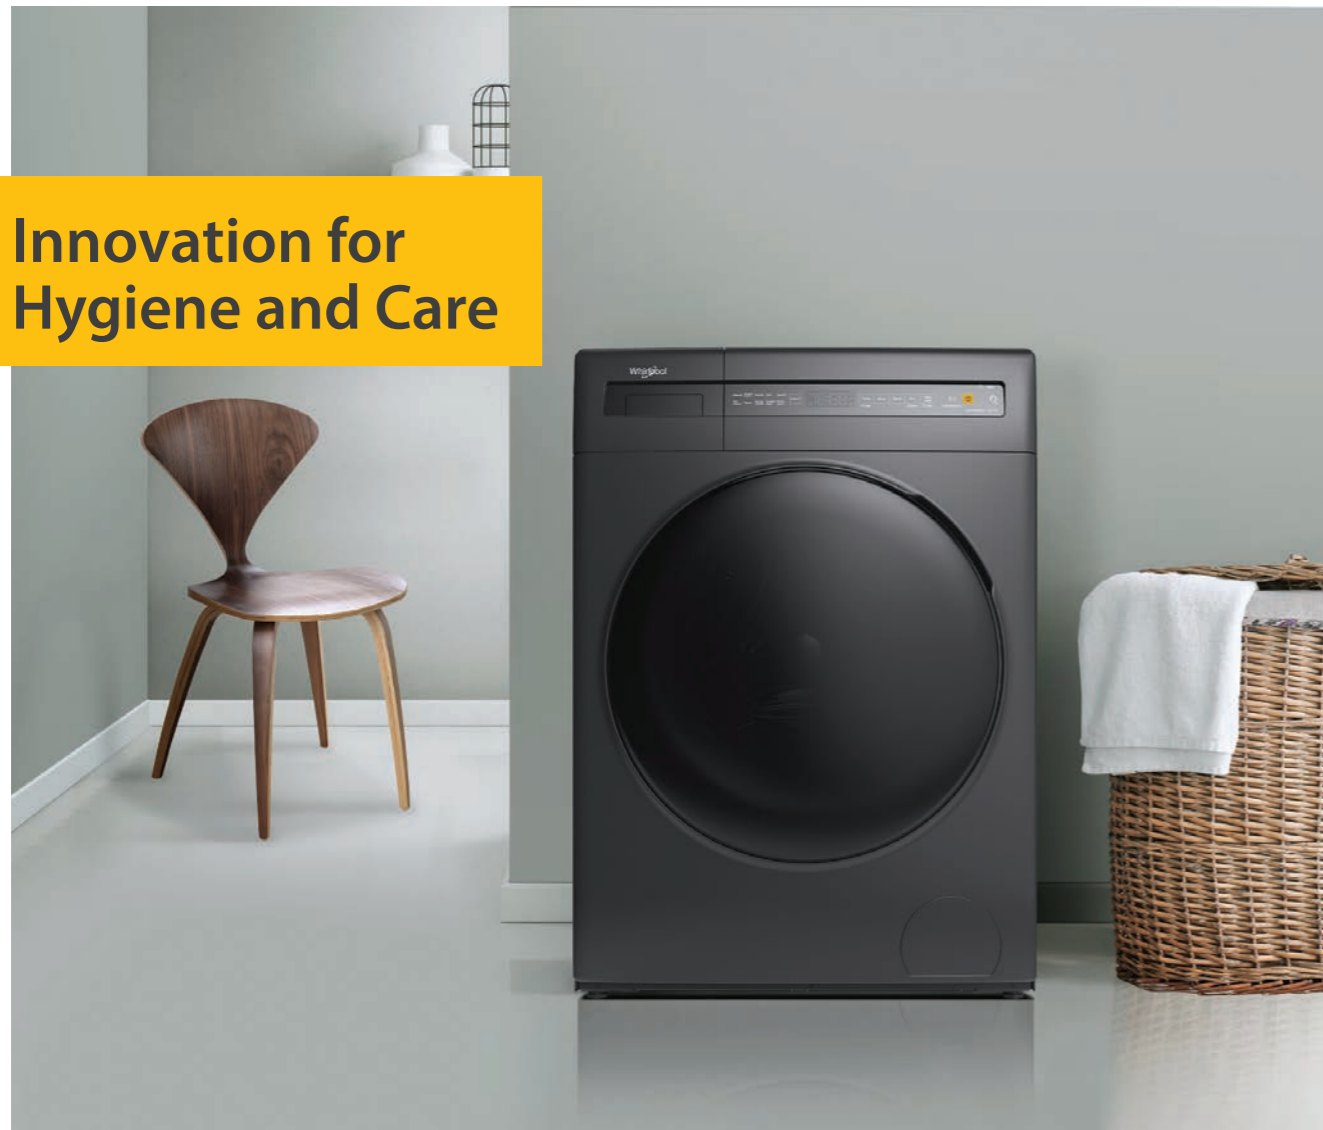

During the first rinse, the laundry sanitizer is incorporated to thoroughly **disinfect** your clothes.

03 SOFTEN

During the final rinse, softener is added. It **removes any remaining residues** from the sanitizer disinfectant solution, leaving your fabrics soft, fresh, and free from any potential skin irritants.

¹ Tested by SGS, based on GB 21551.5-2010. Removes up to 99.9% on *Escherichia coli*, *Staphylococcus aureus*, *Aspergillus niger* with Sanitize Wash program at 40°C with laundry sanitizer at recommended dosage.

Innovation for Hygiene and Care

Eliminates 99.9% pollens and dust mites

Heated up to 90°C, **Allergy Care program**² is a powerful high temperature wash designed to eliminate 99.9% of pollens and dust mites. Ensure your laundry is pristinely cleaned for the delicate skin of babies and elderlies.

Removes odors and bacteria without washing

Hot Air Refresh³ program uses heated air to remove unpleasant odors and bacteria without washing, making it ideal for non-washable household items such as pillows and stuffed toys, and wool coats and sweaters that have been stored for long periods. It also softens and de-wrinkles garments for immediate wear.

Prevents 99% bacteria and mold growth

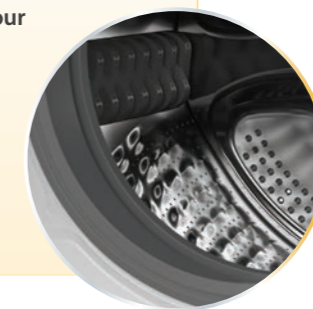

The **Antimicrobial Drawer and Bellow** is injected with an anti-bacterial agent during production to help prevent 99%⁴ bacteria and mold growth even after long-term usage.

Did You Know?

Your washer's detergent drawer and bellow are susceptible to bacteria and mold build-up over time. SaniCare protects your clothes with the anti-bacterial agent, minimizing the chances of your clothes coming into contact with bacteria.

How often should you clean your washing machine?

For daily to frequent washing, we recommend putting your machine through the Drum Clean program every 1-2 weeks⁵.

90°C hygienic clean

Total cleanliness in-and-out. The **Drum Clean program** heats up a drum load of water at a high temperature of 90°C, effectively sterilizing and cleaning every nook and cranny to remove bacteria and germs for easy washer upkeep and a clean wash every time.

² Washer only. Tested by SGS, based on GB 21551.5-2010. Removes up to 99.9% pollens and dust mites with Allergy Care program at 90°C.
³ Washer-dryer only.
⁴ Tested by TÜV SÜD, Chinese Academy of Sciences for Escherichia coli, Staphylococcus aureus.
⁵ Subject to individual usage.

Designed for Flexible Laundry Days

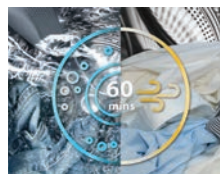

Wash 7kg daily load in 35 minutes

Quick and clean clothes with the **Time Wash option**, wash your 7kg daily laundry load in 35 minutes⁶ according to different soil levels.

Clean laundry at the touch of a button

Whirlpool's 6th SENSE intuitive technology in the **Auto Start**⁷ **function** senses your laundry load and automatically selects a suitable wash program with a 3-second press on the Start button.

Wash & dry in 60 minutes

SaniCare Washer-dryers automatically complete a full wash and dry cycle within 60 minutes for a small load. Simply select the **Wash & Dry 60'** **program** to get fresh and clean laundry effortlessly.

Add clothes at any time

Missed out a shirt? Simply pause your wash cycle to add⁸ your clothes at any time without compromising on wash performance with the **Add Clothes option**.

Two different drying modes for convenience

SaniCare Washer-dryers are equipped with the **Dual Dry option** to meet all your laundry needs. For busy days, use the Auto Drying program to wash and dry without the need to transfer any clothes out. It also functions as a standalone dryer to help dry wet laundry at any time.

Fabric Care for Quality Garments

Dedicated program to remove tough stains

Made a mess? **Stain Wash** is a dedicated program for tough stains' removal using varying water temperature at different stages during the wash cycle, so as to ensure no mess is left uncleaned.

Up to 8 hours tumble for less ironing

Don't rush and worry about getting the laundry after a cycle ends. With the **Anti-wrinkle option**, the drum continues to gently tumble for up to 8 hours. Your clothes remain fresh, soft, and unwrinkled for less ironing.

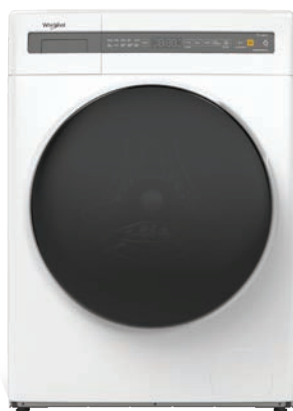

Innovative drum design to prevent fabric wear and tear

SaniCare's Care Lifter and innovative drum design minimizes friction between clothes when washing and drying, prevents fabric wear and tear and is also gentle to your laundry. In a Washer-dryer, the **Care Lifter** distributes hot air evenly for consistent drying performance.

⁶ Based on 10.5kg Washing machine and 11/7kg Washer-dryer models using Mixed Program.
⁷ Not recommended for delicate garments.
⁸ Only when Drum temperature is below 50°C.
