**Features & Benefits**

	<p>&lt;Smart Clean&gt; The action of the steam released during this special cleaning cycle allows dirt and food residues to be removed with ease. Pour 200ml of drinking water on the bottom of the oven and use the function for 35 minutes at 90°C. Activate the function when the oven is cold and let it cool down for 15 minutes once the cycle ends.</p>
	<p>&lt;Turbo Grill&gt; Fan grilling technology that cooks quickly and more evenly with a boost of hot air surrounding the grill zone. This feature has been designed to create a spit roast effect, so even thicker pieces of meat are crisp on the outside and tender on the inside.</p>
	<p>&lt;Forced Air Convection Bake&gt; A quick and easy cooking method that doesn't require pre-heating. The fan distributes hot air evenly to all parts of the oven and even allows cooking.</p>
	<p>&lt;Convection Bake&gt; Facilitates the rising of doughs and batters by employing fan assisted heat from both top and bottom elements for perfectly baked goods.</p>
