Features & Benefits

	<6TH SENSE Functions> Always achieve perfect results effortlessly, with 4 pre-set functions that can automatically set the heat level when selecting the cooking method.
	<Induction Technology> Induction technology heats the pan, not the hob, reducing energy dispersion as well as achieving faster and energy-efficient cooking.
	<FlexiSide> Maximize cooking flexibility with the freedom to place pots anywhere in the area and have a more uniform heat distribution..
	<Chef Control> Continuous cooking from high to low temperatures with a slide on the surface for added flexibility.
	<Booster> Thanks to the Booster function which the cooking zones of the hob are equipped with, boiling times are significantly reduced.
	<Easy Installation> The hob comes with a thinner platform, the zero-gap structure lays down directly on the worktop and with minimum worktop thickness.
	<Control Panel Lock> Featuring a control panel lock system to prevent toddlers and children from accidentally using the hob.
